

## ON-LINE WATER QUALITY ANALYZERS

Waltron produces the most advanced online analyzers for continuous measurement of specific contaminants in ultra-pure, industrial, and drinking water systems worldwide. We supply a full range of precisely manufactured reagents and standards that are ready to use, with no end user preparation or mixing required.

### Benefits of Waltron Analyzers

- ◆ Low reagent/standard consumption
- ◆ Minimal maintenance
- ◆ Long service life, low total cost of ownership

PARAMETER	MODEL	RANGE(S)	TECHNOLOGY
Copper	3045	0-100ppb, 0-3000ppb	Colorimetric
Dissolved Hydrogen	9091 9091C portable	0-1000 µg/L, 0-10 mg/L, 0-100cc/kg	Potentiostatic
Dissolved Oxygen	9065 9065C portable	0-2000ppb, 0-45ppm	Luminescent
Ethylene Glycol	3049	0-15ppm	Colorimetric
Hardness	3051	0-1000ppb	Colorimetric
Hydrazine	3044 9071 9071C compact	0-100ppb, 0-500ppb 0- 1000ppb	Colorimetric Amperometric
Iron	3048	0-100ppb 0-	Colorimetric
Oil in Water	2410	99 ppm	Nephelometric
Phosphate	3042	0-5ppm, 0-15ppm, 0- 150ppm*, 0-300ppm*	Colorimetric
Silica	3041	0-500ppb, 0-5ppm, 0-150ppm, 0-300ppm	Colorimetric
Sodium	9031CX compact 9032X auto cal 9033X auto cal	0.1ppb-10ppm	Ion Selective

Other parameters and additional ranges are available upon request.

\* External dilution module

## PRODUCTS

### READY-TO-USE REAGENTS AND STANDARDS PROGRAM

- ◆ No additional preparation or mixing required
- ◆ Specially formulated for Waltron and other brand analyzers
- ◆ Produced from the highest grade raw materials
- ◆ Pre-purchase discounts and hassle-free scheduled release programs

### SAMPLE CONDITIONING MODULES

- ◆ Single- and multi-point models available
- ◆ Custom built to order
- ◆ No routine maintenance required
- ◆ Sold separately or part of complete engineered design

### HAZARDOUS LOCATION (Z-PURGE) ENCLOSURES

- ◆ Encompasses variety of different classifications worldwide
- ◆ No routine maintenance required
- ◆ Sold separately or part of complete engineered design
