RE: Building Occupant Notice
St. Albert the Great School – Asbestos Abatement Project

This is to inform you that a State licensed environmental contractor, Celtic Environmental will be performing floor tile/mastic removal activities in 6 rooms and hallway of the school, August 28-September 5, 2014. Areas will be isolated from the remaining parts of the school until final air quality standards are achieved. The Illinois Department of Public Health from Federal Regulations, has adopted these standards.

During the removal process, air-scrubbing machines will be running 24 hours, and an independent, State licensed, environmental consultant will be in the work area managing the process and taking daily air quality samples.

At the completion of the work an Asbestos Project Manager's report will be prepared and submitted to the school, the Archdiocese of Chicago and the Illinois Department of Public Health. This is a permanent record of the work activity and sampling data.

The School's copy will be in the School's administrative office and is available to the public for reviewing. An appointment should be made to review this document. It cannot be removed from the Administration Offices. Upon request, a copy can be purchased from the School.

All the removal, management, and documentation work will be performed in accordance with Illinois Department of Public Health's Rules and Regulations.
