Tampa Bay's Premier Awning Company Since 1957

COMMERCIAL INSTALLATIONS

A NAME YOU CAN TRUST

West Coast Awnings has proudly served the Tampa Bay Area for over fifty years. Always locally owned and operated, we are committed to servicing the community in which we work and live.

We are constantly building upon our reputation for excellence in design, manufacturing and installation. As a family-owned company we place the highest value on honesty, integrity and fairness and we believe that our success depends entirely upon the satisfaction of our clients. The successful completion of your project is our top priority and you can expect the same personal service and customer care upon which we have built our name. Call us today to get your project started.

Professional Design Services and Engineering

OUR COMMITMENT TO QUALITY

West Coast Awnings seeks to provide every client with the highest quality products and installation services. We use only Gore® Tenara thread which was specifically developed to withstand Florida's harsh U.V. rays and salt-air environment. Gore® thread is vastly superior to the standard polyester thread that most awning companies use and it is guaranteed not to fail for the lifetime of your awning.

Our fabrics, from trusted names like Sunbrella® and Sattler® are 100% solution-dyed acrylic canvas for outstanding durability and fade resistance and are backed by a **10-year manufacturer's warranty**. With over 400 colors and patterns to choose from, your project is certain to perfectly match your home or business' exterior and architecture. Custom powder coating is also available to color match any metal surfaces to your design needs.

We exclusively use aluminum and stainless steel components in our construction to prevent corrosion and ensure lasting quality. Your project is too important to use anything but the highest quality materials or to trust anyone but the leader in the shade structure industry. Call us today for more information.

AN APPEALING INVESTMENT

There are many benefits to investing in an awning or shade system. Our clients have reported financial savings and increased enjoyment of their property years after an installation. Some of these benefits include:

Protection From the Sun

Shade structures make hot, stuffy patios and interior rooms more comfortable and usable by blocking the harsh sun, keeping these areas cool and stopping unwanted glare. Awnings and canopies also protect furnishings and sensitive skin from the harmful effects of damaging ultra-violet rays, helping you protect both your health and your investments.

Energy Savings

Our structures have been shown to reduce cooling and energy costs by as much as 25%. This makes your awning both a cost saving and environmentally friendly "green" solution for your climate control problems.

Added Curb Appeal

Eye-catching architectural features add great value to your property. Awnings also create attractive signage and advertising space as well as soften the look of commercial and industrial buildings by brightening up plain walls with color and contrast.

Expanded Living Areas

Retractable awnings and screens for both solar and insect protection make patios and decks comfortable in all weather conditions. They increase usability of outdoor seating and hospitality areas during summer months and help protect outdoor furniture. Retractable awnings can reduce summer temperatures by as much as 15 degrees.
