

ADOPTION

If you clicked onto this page, perhaps you have some questions about adoption we can help with. You might be feeling unsure, overwhelmed, sad, scared, and even backed into a corner after receiving the results of your pregnancy test.

If you are facing an unplanned pregnancy none of your choices are easy. For some women *adoption* can be a loving option.

It is so wise of you to look at all your options!

Give yourself time to make the very best decision.

Your first decision is whether or not to continue your pregnancy. An appointment at Alternatives Medical Clinic is a good start to getting the information you need to move forward with a decision concerning your pregnancy.

You can make a plan. One step at a time!

What do you know about adoption? There are a number of websites that can give you all the information you need to know about the different types of adoption: *Open, Semi-open and Closed*.

It is important to know that moving forward with adoption does not mean you are giving up your child-you are giving your child the life that you truly want for him or her.

- Some women choose adoption because they want their baby to have both a mom and dad to raise and provide security to their child.
- Others want to wait until they are married, and in a secure relationship before raising a child.

You are the best person to decide what your child needs and should have, so think carefully about your choices!

Perhaps it would help to listen to what one mom has to say:
