## **Emergency Preparedness Plan**

### **Fire**

In case of a fire emergency (in a case where the fire alarms have sounded or when the director/staff calls notices or receives notice of a fire) ALL students will:

Remain calm and walk swiftly, orderly towards the emergency fire exit located to the right of the youth pastor's door (if facing the three offices upstairs). The exit sign is highlighted. Once exiting the door, students are to walk with staff to the back end of the parking lot and then walk to the church next door, away from the fire and away from any traffic. Once at the church, staff will account for each child, relay this information to the fire department. Staff will take role and parents will be notified.

According to the Fire Marshall, even the students within the back classroom should be able to get out through the emergency exit back steps, in under two minutes. In the event the children are trapped, the next safest plan for the back classroom would be to close the door, to place something under the door to conceal the smoke and to try notifying for help through the window. Due to the age of the children (K-2) in the back classroom, it is NOT recommended to have chain ladders reserved for the windows.

### **Tornado Warning/Watch & Bomb Threat Situation**

In case of a tornado warning/watch, (initiated when inclement weather presents an unsafe situation for the children [for ex. Power outages, strong winds, trees coming down] or when notified of a tornado situation or when notified of a potential bomb threat situation).

ALL students will:

Remain calm and walk swiftly/orderly down to the first floor and to remain in the middle hallway until told otherwise. Staff are to close the doors to the bathrooms and to the door near the steps and have the children to sit calmly on the ground. According to the Fire Marshall, this is the safest place in the building in case of a tornado. In the event that the hallway is unavailable or in the event that there are more people in the building during the tornado warning/watch, the 2<sup>nd</sup> safest place in the building is what we term "the multipurpose room." Even with windows, it can still house protection for large groups of people, according to the Hanover Sheriff's Department. In both scenarios, staff members are to immediately take roll to account for all children, relay this information to the Fire Department and to notify parents.

### **Lockdown**

In case of a lockdown procedure (which is initiated if notified by the police that there is a threat in the area or if the director feels as if there is a situation that will place students in immediate danger) ALL students are expected to:

Remain calm and follow staff directions. The first plan of action is to transport all children to the fire exit steps. This location allows not only for shelter, but also for easy escape, if necessary.

If this location is not an option, the following alternatives will be exercised:

- (1) If the children are in the small classroom upstairs, staff members are to close and lock the door. Lights are to be turned off.

(2) If the children are in the large classroom upstairs (and the back steps are not an option), the three office rooms can be used for shelter. Staff members will turn off lights and close the blinds on the windows of the door for security.

In either situation, staff will members will take roll, relay any information to the police and notify parents.

In all emergencies, our staff will utilize emergency “go bags.” These are book bags located in specific places in our classroom that contain emergency contact and allergy information on all students as well as a first-aid kit, in case of emergencies. Our children know they are not to touch these bags, as they are for emergencies, only.

I have read, understood and I am now in full acknowledgement of the SonLight Learning Center Emergency Preparedness Plan that covers Fire, Tornado, Bomb Threat, or other Lockdown procedures.
