

January Newsletter

Hello Parents,

We had a great month! It was great to be all back together after Christmas break. We learned the letters D, G and O and we started learning our numbers starting with 1 and 2. We can't wait to continue working on our math skills the rest of this school year. We will continue with more number and counting practice and learn more about tallying, estimation and patterns. This month we learned about snow and ice and did some fun snowman themes games and experiments. We also filled our classroom bucket and celebrated with a pajama/hibernation day. We got extra cozy and learned all about hibernating animals. We also had some special guests come to talk to us about Chinese New Year and celebrate with us!

As we learned our letters this month we explored some special themes. We had a week of "D is for Dinosaurs" where we got to do lots of fun dinosaur games and projects. Then as we learned letter O we explored the theme "O is for Ocean." We had an ocean sensory table and cool ocean crafts.

We had such a fun month of crafts, games, experiments and learning and we can't wait for next month!
