

Butterfly Room March Newsletter

Hello Parents!

We had a great month in the Butterfly Room! We worked on our Pet Project by writing all about the pets that we have or would like to have and shared with the class. We have also been taking home our class pet Mittens and sharing our adventures with the class!

This month we got a visit from a real vet! She told us all about her job taking care of pets. Throughout the month we have been playing a lot of fun pet games.

We celebrated St. Patrick's Day with lots of fun crafts and science experiments. We did a shamrock craft, we painted rainbows and we even got to set our very own leprechaun trap just like in the book "How to Catch a Leprechaun." Our class leprechaun left us a rainbow and a pot of gold!

We also celebrated Easter with an Easter egg hunt, a Easter egg shake and guess game and some cool crafts.

We learned the letters J, Z and W and made jellyfish, zig-zags and did a water experiment. We also learned the numbers 7 and 8.

We had a lot of events this month! We had our Grandfriends come to our classroom to visit. The children loved showing them around and bringing them to music class! We also had our Art Show and church service. Finally we hosted Chapel this month! After learning the Easter story we shared a book and a song with our friends and collected offerings for the Humane Society.

Thank you for your help this month! If you have any ideas for our pet project or are interested in volunteer opportunities, please let me know!
