

Butterfly Room March Newsletter

Hello Parents!

We had a great month in the Butterfly Room! We have been working on our book project. We talked about our favorite books and made book reports. We also transformed our dramatic play center into a Library! Finally, we had an author come and talk to us about how to write a book and answer our questions. We celebrated St. Patrick's Day this month with lots of fun crafts and science experiments. We did a shamrock craft and set our very own leprechaun trap just like in the book "How to Catch a Leprechaun." Our class leprechaun left us a pot of gold lucky stars! We also did a coin science experiment. We also celebrated another holiday this month called Holi, the Festival of Colors.

We learned the numbers seven, eight, nine and ten and did lots of practice with ten frames and tallies.

We learned the letters J, W and Z and V. To go with our letters we made a jumping jelly bean craft, a zoo craft, did a wheel art exploration and a volcano craft and experiment!

We had a lot of events this month! We had our Grandfriends come to our classroom to visit. The children loved showing them around and bringing them to music class. We also had our Art Show and church service. The kids made butterfly paintings and a class hanging butterfly display. Finally we hosted Chapel this month! We talked about the story of Zacchaeus with the help of Pastor David. And to go with our book project we collected books for the Hinsdale Family Medicine Clinic.

We are excited to continue our learning next month!
