

Look at What We are Learning!

The Ladybug Room
March Newsletter

Mrs. Lithio and Mrs. Umbrasas

Spring has given us wonderful opportunities to learn about the world around us through our Nature Project. We've been studying birds that we see at our feeder and learning to draw and paint them for our Art Show.

We sang songs for Jesus and our families in church, then we enjoyed showing our birds and class mural at the Art Show afterwards.

We loved having Grandfriends share a morning with us. We measured feathers, traced handprints, read, sang, and went to Music together. It was a very special day!

The children were scientists as they dissected a daffodil to examine and count petals parts like petals and stamens, as well as examine the roots and bulbs. We also examined bird skulls, feathers and footprints!

We loved celebrating Easter! We know that Jesus died for us and lives because he's stronger than death. God loves us SO much!
