September 2022

Monthly Newsletter

Phonemic Awareness

Letters of the Week:

Ss, Aa, Tt, Pp

We have begun our study of letters in the Butterfly Room. With each letter we will learn a new Jolly Phonics song that helps us learn the letter-sound connection. We will also hear new poems and books associated to our new letters and create a class list of words that begin with each letter.

Students will create mini letter books by identifying beginning sounds, and also coloring and gluing phonetically appropriate pictures on each page.

Handwriting Practice

Students will gain practice with letter formation during Name Exploration. Students will also gain practice with ABC Book pages for Letters of the Week when they draw and label pictures with correct beginning sounds, recalling words from our class created lists and practice correct letter formation for each letter.

Mathematics

Numbers of the Week:

1, 2, 3, and 4

Students will begin practicing correct number formation, learning the top-down method. Students will also begin learning shapes by practicing sorting, identifying, and classifying circles.

Jesus Time

Students will learn that Jesus loves them always, no matter what and that all children are important to Jesus with daily bible stories.

Art

Students will participate in a cross-curricular art activity linked to math with a circle collage made with both paint and construction paper shapes.
