

Look at What We are Learning!!!

The Fish Room September Newsletter

Mrs. Kowalski & Ms. Vega

Red

We created Red Ink Blot pictures with dictations of what each blot looked like.

Jesus Time

This month we read the story Jesus Blessing the Children. We talked about our friend Jesus and how much He loves EVERYBODY! We have learned that he is never too busy for His children.
(Matthew 19:13-14)

Color collages

After learning the different colors, the children demonstrated their knowledge by creating color collages. For each different color, the children first sorted through a variety of materials from our art center looking for certain colored items. Each child was then given the opportunity to add some of these items to a color coordinated poster board collage.

Blue

We used different shades of blue paint and salt to create blue saltwater oceans.

Yellow

We looked high and low all around our classroom when we went on a yellow hunt.

Color Mixing

The children were very excited to mix colors together to create a new color. The children were able to experience mixing colors first hand by finger painting at the easel. We learned Blue + yellow= green, red + blue= purple and yellow + red= orange.

Circle Time

Here are just a few things we are learning during our morning circle time:

- Recognizing our names through the use of our attendance pictures, the question of the day, and our helper chart.
- One-to-one correspondence counting by counting who's here and who's missing
- listening and following directions
- our classroom routines and rules.

Music Together

We have been having a blast singing and dancing in music class with Ms. Emily! Please find your Music Together materials in your child's cubbie. (remember, each family will be given only one set of materials to the eldest sibling.)
