

## January Butterfly Room Newsletter

Hello Parents!

We had a great month! We learned the numbers 1, 2 and 3 and the letters D, G and O. We learned about winter and snow and ice. We did cool science experiments like making our own snow, melting ice cubes and freeing animals trapped in ice! We also made lots of winter crafts like snowmen, snowy trees and polar bears.

At the end of the month we started learning a little about the ocean which we will continue into February. In Jesus time we learned about the 3 Wise Men who came to visit Jesus and about Jesus as a child. We made offerings to the Dovetail Project at our January Chapel. We also got to celebrate Lutheran Schools Week by working on a whole school art project! We will continue to learn and grow together as we start a new month. Thank you for your support this month!
