

# The Community Service And Support Network

## Large Scale Volunteer Help for Communities

### **Each Community Service and Support Network (CSASNetwork.org) exists:**

- *To align their community through comprehensive System and Structure that synergizes diversity into more productive passion-aligned service.*
  - *When people of differing skill sets align themselves with people of the same passionate interest, they tend to be energized by working together. A sense of accomplishment, a renewed belief in what could be and a greater confidence to continue is instilled as they synergistically apply their combined skill sets to their endeavor of import.*
- *As an extension of the community's Christian churches to facilitate the flow of disciples into broad-based community service.*
  - *As pastors equip and serve the individuals of their congregations, the CSASNetwork provides the ease of connection necessary to help them then partner with passion-aligned community service organizations.*
  - *As disciples enter into community service, they have the additional opportunity to serve as salt and light to those around them - sharing God's good news.*
- *As a place where any and all people may easily find connection with passion-aligned community service organizations in supportive service.*
  - *Every person in every community has something to offer back to the people of their community. Serving together overcomes division and encourages unity. Besides, we need everyone - the needs are great!*

### **Web-Based Support for Broad Volunteer Engagement**

- *The Community Service and Support Network is a comprehensively organized facilitative web-based system that draws, aligns and synergizes large scale high-capacity leaders into 4 Organizational Groups of 12 Teams across the community. These Teams of Groups and Groups of Teams co-lead to support community organizations and each other – all on a volunteer basis.*
  - *Broad success rises and falls on the back of high-capacity leadership. CSASNetwork's Organizational Structure aligns high-capacity Co-Leader volunteerism for the development of broadly scoped high-capacity Support Teams through concise Service Opportunity Descriptions.*
- *CSASNetwork's Web Based Searching allows the inquiring volunteer to narrow their search of the hundreds of non-profit entities and thousands of volunteer options available community-wide to only those that match their People Group of Interest. CSASNetwork allows the inquiring volunteer to select within six combinable search refinements that quickly identify the organization and Service Opportunity that is their best fit.*

### **The CSASN solution**

#### *Benefit 1: Non-Profits Hire More Experienced Professionals to Serve More People*

- *The freely given professional and skilled services provided to non-profits allows them to reallocate the funds previously spent on those services toward additional mission-specific professional staff.*

*Benefit 2: Reduced Cost of Government*

- *Community health and neighbor goodwill bring down costs. For example, the cost of government services related to police, jail, recidivism, homelessness, addictions, poverty and related crimes is reduced. More youth avoid lives of isolation or crime as they plan their future together.*

*Benefit 3: Desirable Community in which to Live, Work, Play... and Stay!*

- *Community Unity, goodwill and well-being improve as the people in service are celebrated, share their stories and encourage others to join in the fun. Our most productive people will be more likely to remain and our regions be far more attractive to those considering a new place to live, work and play!*

*Benefit 4: Increasing Volunteer Involvement*

- *The latent mass of community individuals who would otherwise serve will eventually join in the fun as they see first-hand the value of community involvement.*
