

Willow Grove Connections Community Services uses a Personal Life Plan (PLP) system which allows mentors/coaches to get reports, schedule, and update and add tasks. Assignments are automatically created since the life plan system is integrated with our survey system. Our life plan system allows participant information to be organized in a centralized location. Track dates that assignments were scheduled and completed sign off dates along with mentor/coach final approval. Create and update program participant specific assignments including strengths needs and strategies. PLP enables participant leaders, case workers and participants to:

- Track dates that assignments were completed.
- Track participant and leader sign off dates.
- Provides for participant leader final approval.
- Track participant's progress with current information.
- Create generic assignments for the participant.
- Show participant objective and current progress.
- When the personal life plan is integrated with our employer network system this is one of the most robust and highly automated applicant processing and personal life plan systems available today.
- Once a participant has been enrolled in the program, they will then be available to start identifying current and future training and mentoring requirements. This provides additional streamlining to the enrollment process and ongoing participant assistance.
- Participant leaders or case workers can set up predetermined life plan specific requirements, which will automatically be included when the participant's life plan is created. Employers can also use this as a recruiting tool. The personal life plan system integrates with our employer network system to provide a fully integrated year round tracking solution.
- Participant leaders or case workers can add strengths, needs, and strategies for each assignment and can be integrated with the participant educational planning. Provide participants with access to job descriptions and requirements providing participants with access to an overview of employment and life counseling opportunities.
- Empowers participants with knowledge of career opportunities and employers with trained employees that have a support infrastructure to assist them when needed.

Community Services

OUR COMMUNITY SERVICES ALSO INCLUDE

Mentoring

Our Mentoring module allows for people to be entered into the system as a mentor. Mentors enter in name and areas in which they have expertise into the system. The company then can search for a mentor based upon the service or help they need. The search engine will then list all of the business mentors that meet the search criteria.

Housing

Use the participant housing module to assist program participants in finding approved housing. Our Housing Link module allows for housing information to be entered into the system. Housing information such as address, amenities, type of housing, and rental fees can be entered into the system. Participants needing housing can then search for housing based upon price range, amenities, and type of housing desired. The search engine will then list all of the housing that meets the search criteria.

Employer Network

The Employer Network Module allows people to complete an employment application online to those sponsoring companies of the program which is specifically tailored to the organization. Depending upon the parameters established by the organization, automatic notification of applicants meeting such criteria can be sent electronically to the specific hiring manager.

Approved Web Site Resources

The web site system allows program managers to create a database of searchable web sites. Enter only the web sites in which the information is beneficial to the company. Program managers can enter a title, the URL, and a description of the website or web page that is being referenced.

Testing and Assessment

To evaluate and assess the efficacy of program company training and education, WGC has developed the Online Testing Module. The OTM may be configured in any number of styles, including multiple choice and short answer/essay formats, and will support the inclusion of imagery and multimedia resources.

Training Center

Publish any amount of simple or complex curriculum materials using this robust relational database module. Plus, there is the ability can take advantage of advanced management tools that control when content is available, who can access the system, and what prerequisites are required.

Events Calendar

The Events Calendar Module provides a calendaring system of events for organizations. The Events Calendar Module allows for events to be entered through an administrative web site and immediately be displayed to the entire organization. Program attendees can review the details of the event and if necessary register for the event.

Digital Dictionary

Our Digital Dictionary system provides a searchable database of terms and definitions. There is the ability to provide multiple integrated dictionaries for their users. When adding terms and definitions there is the capability to select which dictionaries to associate with the term and definition.

Message Board

The Message Board Module allows for discussions with other participants. The discussions are based upon different forums that have been entered into the system. Participants can respond to any of the previous responses in the system.
