3) Paradigm: A _____ underlying the theories and methodology of a particular scientific subject.

4) _____-evolution: small changes within a species

_____ -evolution: large changes into new species

5) Intelligent Design says that the complexity of the systems of this universe and the complexity of life are far too complex to be random, and therefore require a _____ - _____ capable of constructing the systems we see.

6) Even if evolution, as Darwin saw it, was completely true, it cannot explain the origin of the universe or the origin of life. Evolution is _____ without life to evolve and a place for it to evolve in.

7) The purpose of Genesis was to show us the _____ rather than the _____, and to teach us knowledge of God rather than physical science.” J.I. Packer

8) We should desire to understand things and to know truth, but the most profound truth is not hard to understand: “Jesus said, ‘ _____ .’”

Small Group Discussion Questions

Please try to think these over and jot down some ideas prior to discussing them at the meeting, it will improve the discussion.

Some beliefs of the church are considered essential to true Christianity. Others are not. List three essential beliefs and three non-essential, and explain why you chose them. Scripture references would be nice. :)

What problems might arise if we treat non-essentials as essential?

What problems could we expect if we treat essentials as non-essential?
