

Monitor Support Worksurface sits on top of NS30 or NS40 Net/Stations rack enclosures and can be aligned flush with the front of the enclosure. It is intended to support keyboards and monitor while allowing air flow through the top of the Net/Station.

This data sheet illustrates the MSW-19-P which provides a writing surface, and an elevated monitor platform. The ventilated area under the monitor behind the writing surface can accommodate a KVM.

The support is of welded 16 ga. steel construction and has a textured black powder coated finish.
